## Summary/Description

This is a unique Protector, designed with twin Diesel to give long range performance and reliability. She is loaded with options.

### **Major Price Reduction - Incredible Value at \$199,000 CAD (Approx. \$145,000 USD)**

The owner has already purchased his next boat and this Protector must go. At this price, it represents outstanding value—less than many smaller Protectors with far fewer features.

This 2009 Protector 35 Targa is a rare offering: a high-performance RIB powered by twin Mercury 350 HP diesel inboards with low hours. Designed for long-range reliability and all-weather performance, it delivers the toughness, safety, and capability that Protector is known for, with more space and headroom than anything else in its class.

The pilothouse features twin LeBrock helm seats, an L-shaped leather bench with teak table, and a full canvas enclosure for all-season comfort. Electronics include dual Raymarine hybridtouch displays, autopilot, radar, twin ICOM VHF's, bow thruster, FLIR night vision, and more ready for serious cruising in any conditions.

Below, the cabin offers teak bulkheads, a private head with electric flush, accommodation for up to five, a stereo system, cabin heater, and quality teak finishes throughout.

Additional highlights include stainless rails and fittings, teak decking, underwater lights, polished plow anchor, swim platform with fold-down boarding ladder, and a full complement of safety and convenience features.

This is one of the toughest and most versatile boats on the coast....ideal for West Coast cruising, offshore runs, or family adventures. Rarely available at this size, power, and price point.

The Protector TARGA design offers a fully enclosed cabin design with ample deck space, dive platform, seating for up to 12 adults, two 7' bunks, electric head and secure storage for overnight boating. Optional TARGA cabin tops include a full glass windshield hard-top, a 3/4 windshield hard-top and a 3/4 windshield canvas top with a stainless steel frame. The TARGA's solid laminate, fiberglass hull is built for strength and safety and the chambered hypalon tubes provide shock absorption, stability and additional flotation. Together, the deep-V hull and UV resistant tubes create unmatched safety and performance compared to traditional hard sided boat designs.

The Company offers the details of this vessel in good faith but cannot guarantee or warrant the accuracy of this information nor warrant the condition of the vessel. A buyer should instruct his agents, or his surveyors, to investigate such details as the buyer desires validated. This vessel is offered subject to prior sale, price change, or withdrawal without notice.
