Internationally renowned designer, German Frers, plumbd the bow and carried the beam aft on the new Hylas 46 to offer a larger water line and highest performance. The Hylas 46 interior is also quite different from other yachts. From her six large deck lights in the main salon with 6'8" headroom, to her dual passageways leading to the aft cabin, the Hylas 46 offers the light and airy space of a 60 footer. The unparalleled teak joiner work gives a feeling of warmth and strength found only on yachts defined as luxury.

Once you're at the helm of the Hylas 46, you'll immediately know you've made the perfect choice.
