# The Hallmark Of Success.

Nothing can compare to the exhilaration of gliding through the water at the helm of your own motor yacht or sport cruiser. Nothing does it better than a Carver.

Thanks to the continuing success of our innovative yacht design programs, Carver has become one of the premier full-line manufacturers in the industry. With an impressive product line of twenty luxurious new motor yachts, sedans and cruisers, there's a Carver yacht specifically designed to turn your dreams into reality—from a carefree trailerable sport cruiser to an impressively elegant pilothouse motor yacht.

The hallmark of Carver Aft Cabin and Cockpit Motor Yachts is classic, traditional styling combined with brilliantly sophisticated interiors. If you enjoy extended cruising and vacationing with family and friends, you'll find ultimate comfort, enjoyment and pride in owning one of these exquisite crafts—not to mention tremendous resale value when it comes time to move up.

Step aboard a Carver Aft Cabin or Cockpit Motor Yacht and you'll find an array of significant amenities, including luxurious master staterooms, with large inner-spring berths and private head compartments complete with showers and vanities offering the ultimate in personal comfort. Spacious aft decks with hard tops and enclosures provide superior protection from the sun and weather. Very spacious salons offer plenty of comfortable seating as well as entertainment centers. Fully equipped galleys are superbly laid out to make your meal or snack preparation easy and enjoyable. And skillfully hand-crafted cabinetry in maple, teak or cherry, creates an elegantly appealing environment.

For over a decade these outstanding crafts have set the standards in the industry for comfort and livability—and they continue to be the benchmark used by others. Carver builds twice as many motor yachts featuring the aft cabin design than all other boat builders. So if your goal is to own the ultimate in live-aboard comfort and convenience, there's really only one place you need to look. Choose from seven Carver Aft Cabins, one of them ready to fit your lifestyle perfectly.

Cruising versatility comes to mind whenever the name Carver Voyager is mentioned. Her combination of beautiful contemporary styling, plus the unique cruising and entertainment advantages of a fly bridge, set the Voyager apart. And with her all-weather cruising feature, the optional lower helm station, you and your guests can go below and continue cruising in spite of less-than-perfect weather. Plus, with extended-range fuel tanks, you can enjoy cruising farther.

Spacious pilothouse of 530 Voyager Pilothouse provides seating for six, a command seat with built-in controls for custom seating positions, and an available array of overhead electronics.

To expand your cruising interests and turn your leisure time on the water into something very special, there are four Carver Voyager models in this year's line, each offering superb living accommodations and cruising amenities and ranging in size from 28-ft. to the 53-ft. all-new 530 Voyager Pilothouse.

You'll find extended living aboard a Carver yacht is very comfortable and easy, and this is especially true aboard a Carver yacht with a single-level, open-concept cabin configuration. Last year we proudly introduced the new 350 Mariner and it instantly became one of Carver's best-selling yachts. Climb aboard and you too will be impressed with the roominess and comfort, the unique cabin design and the huge, congenial fly bridge of the Mariner. Enjoy the very large cockpit that's ready for play and the stunning, spacious salon where you can easily entertain. You get the point. She's beautiful, she's charming and there's space for everything.

The Santego series, one of Carver's most popular sport cruisers, also features an open-concept cabin configuration. You will attract loads of attention when you cruise by in one of these splendid, contemporary-styled low-profile crafts. In addition to eye-catching, attractive exteriors, they offer intelligently designed interiors with astonishing space and comfort. If you demand advanced styling and desire the control and entertainment advantages of a fly bridge, you'll find that one of the Carver Santegos will more than satisfy your expectations.

When it's quick and agile performance in a sporty express-style boat you're looking for, the Carver 260 and 280 SE Mid-Cabin Express cruisers offer just that: the performance of a sport cruiser with the quality and value you would expect from a Carver motor yacht. An excellent array of standard features, includes dual-voltage refrigerators, shore power, electric/hydraulic trim tabs, stereo w/cassette, depth sounder, microwave, battery charger and more. In addition, you'll enjoy luxurious seating and excellent sound insulation, as well as comfortable accommodations and generous stand-up headroom.
